## *Introduction / Who we are*

**DW Verbundrohr GmbH**, a renowned German company, with over 20 years of experience in the HVAC-business is the specialist for tap-water and heating / cooling pipe systems within the French Elydan group. With its brand **MULTITUBO system**, DW Verbundrohr GmbH offers situational solutions in the construction & mechanical engineering industry.

Elydan designs and manufactures **innovative, high-performance and durable** polymer ducts and tubes (polyethylene and polypropylene) to build the flow networks that will give life to the infrastructures and buildings of tomorrow, by improving their energy and environmental performance.

# History

***DW Verbundrohr GmbH was founded in 2004 by former managers of a world-renowned Finnish group. The original aim was to offer an underfloor heating system for local wholesalers.***

*With their*

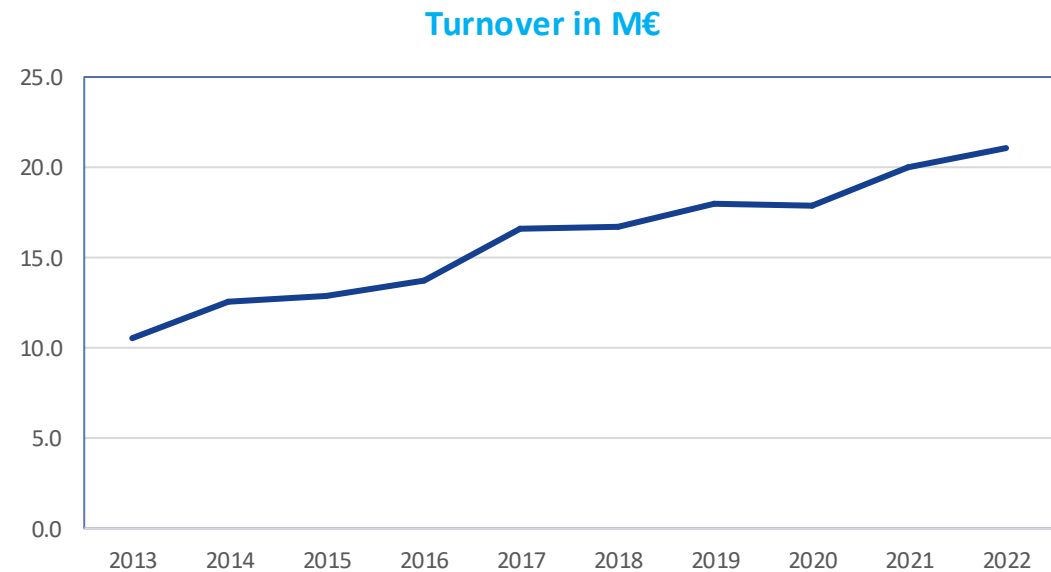

- well-founded specialist knowledge
- intimacy with the customer
- innovation and
- ability to react quickly to the most diverse market requirements, many national and international specialists recognized the potential of DW Verbundrohr GmbH.

The success story of MULTITUBO systems started.

- Export: 25%
- +450 employees
- 340,000 km of pipes and electrical conduits:  
8 times the perimeter of the earth
- +70 extrusions-lines in 7 production-units

## *Our Key to Success*

- Due to our lean and self-sufficient organization as a subsidiary in an internationally operating group, we have many advantages over large and sluggish groups, which are becoming increasingly important.

***For example, we are well-known among our long-standing partners for the following qualities:***

- Reliability
  - Fast reaction due to short communication channels
  - Flexibility
  - Customer intimacy
  - Openness to customer requirements and
  - Market-specific solutions
- Furthermore, we have longterm cooperations with specialised consultants and professionals, with whom we combine our knowledge and experience to our solutions and products.

## *Our Targets and Vision*

- Every market is different and has different requirements. That is why it has always been our target to work closely and on a long-term basis with local partners. With those partnerships we want to achieve to implement
  - a high quality,
  - resource-efficient,
  - energy-saving and
  - long-lasting and thus sustainable system in the individual markets.

***Together, with our partners, we want to learn from the market and grow stably together.***

***Clean water is vital and cannot be replaced by other products. With our durable, high-quality products, we want to ensure a safe and hygienic supply and keep the energy required for this as low as possible.***

# *Corporate Culture*

- DW Verbundrohr is a small, effective and competent team that is able to act across divisions in order to react quickly to customer requirements.
- Each single employee in our slim hierarchies has extensive decision-making freedom and also responsibility. All our colleagues are trained and able to quickly take over solution-oriented decisions in other departments at short notice.

# Partnerships

***MULTITUBO system is known  
in more than 40 countries  
worldwide***

*Our partners are specialized companies that have a  
connection to practice and focus on functionality  
and quality.*

*Many of these partnerships have existed for over  
15 years and have benefited both partners.*

# *MULTITUBO system – Multilayer Composite Pipes*

- **Who knows better what works best on the construction site than the installers.**
- **And every construction site has its own special requirements.**
- **That is why we have developed a system that meets all requirements**

*MULTITUBO systems – for heating-/ cooling as well as for tap-water applications. A unique concept.*

No connection technology perfectly suits for all kind of different installation application.

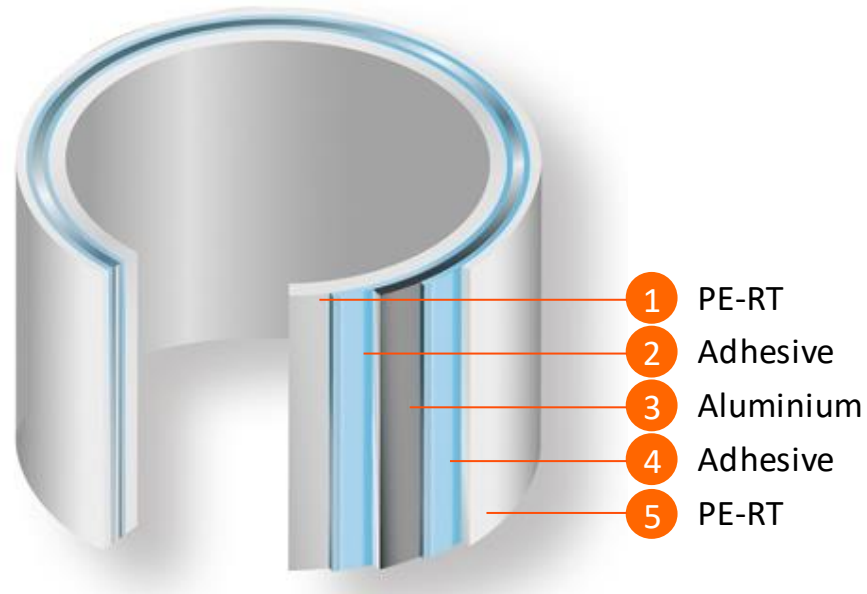

MULTITUBO system therefore provides different connection solutions.

# MULTITUBO system – Multilayer Composite Pipes

- Multi-layer pipes combine:
- Light weight
- An extremely smooth surface
- High bendability
- No Corrosion

with:

- Absolute oxygen tightness
- Form stability
- Low thermal heat expansion

made in germany

# MULTITUBO system – Connection Technologies

- The Classic – our Press Fitting.
  - Metal plated and unplated from dim 16mm to 75 mm
  - PPSU from dim. 16mm to 63mm
- 
- The Versatil – our Modular system.
  - Metal from dim. 16mm to 110 mm

# MULTITUBO system - References
